

MARINE & SHORELINE STABILIZATION SERVICES

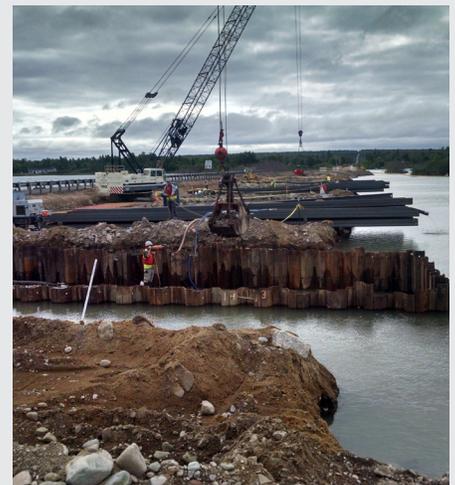

WHY WALBEC?

Strongly rooted in the Midwest, we understand how important the Great Lakes are to our region and the impact erosion on our shorelines can have. Working collaboratively with you, we will listen to your needs and identify solutions that will best preserve the shoreline environment while utilizing innovative stabilization techniques. We understand the different types of rip rap aggregate and the level of protection each provides to the shoreline. We will work with you to identify the best size, our fully-functional mines will then produce the aggregate, and our experienced team will place the rip rap.

CAPABILITIES

- Permitting
- Engineering
- Aggregate (rip rap) supply
- Aggregate placement
- Shoreline construction / repair
- Construction management
