

COMPREHENSIVE SOLAR SERVICES

WALBEC GROUP

WALBEC: UTILITY-SCALE SOLAR THAT DELIVERS

When it's time to meet your renewable energy targets, turn to a **full-service EPC firm** for comprehensive site engineering and construction solutions, backed by a skilled union workforce. Since 1930, Walbec has delivered large and small solar projects throughout the Midwest. We help electric utilities and developers create cleaner energy, ensuring safety, timeliness, and budget compliance. Walbec is your go-to resource for everything from site feasibility, design, permitting, and development to pile installation, racking, and electrical construction.

EPC Delivery Model

CAPABILITIES

As part of Walbec's vertically integrated family of companies, **Zenith Tech**, has the capabilities to self-perform engineering, civil site work, and mechanical and electrical installations, ensuring your project is completed on time and within budget. Our full capabilities include:

- Land surveying, planning, and platting
- Site permitting and site design
- Civil site development: Site grading, soil stabilization, and erosion control
- Temporary and permanent stormwater management
- Access road construction
- Aggregate supply and placement
- Utilization of GPS technology to enhance efficiency and accuracy
- Operation of Vermeer PD10 - 20 foot mast equipment
- Concrete ballast block and anchoring foundations
- Solar construction services including pile and racking installation
- Electrical services

YOUR SOLAR PROJECT PARTNER

From utility-scale arrays to community solar developments, Walbec delivers high-performance Photovoltaic (PV) construction solutions that meet your clean energy targets—on time and on budget. Backed by decades of heavy civil experience and a vertically integrated team, we bring unmatched reliability, self-perform capabilities, and regional reach to every solar project.

OUR POWERFUL ADVANTAGE
